NARA IQ was assigned in a monitoring role for the ADAMS project (CPIC 17110P). This role still requires a Go/No Go Recommendation from NARA IQ based on the results of the testing performed by the user community and review of the testing documents produced.

Attached is the final RVTM on the testing status of the requirements. In addition, We were provided an email (User Sign Off) from the Product Owner indicating that they approve the system delivered.

After review, NARA IQ is providing a **Go Recommendation**.

Thanks,
David Leistner
